Windows Small Business Server 2011 Standard

A complete, on premise solution to small business IT needs

Designed and priced especially for small businesses with up to 75 users, Windows Small Business Server 2011 Standard continues to be an ideal first server solution that includes key workloads that small businesses need to be productive and competitive.

SBS 2011 Standard delivers enterprise-class technology in an affordable, high performance all-in-one solution. It is designed to provide a range of solutions tailored to meet the needs of small business customers at various stages of growth. With SBS 2011 Standard, you will have easy access to e-mail, contacts, calendar and business resources from any Internet-connected PC through the new and improved Remote Web Access. SBS 2011 Standard allows employees to share files, network resources, printers and fax machines while protecting your vital business information with automatic data backups, and recovering accidentally deleted files.

Get access to the latest technologies

Premium Add On for small business offers:

- Ability to run a vast number of line-of-business applications on an additional server
- Capacity to make more informed business decisions with the rich analysis and reporting technologies
- Cost effective solution for a small business environment

Turn mountains of facts and figures into comprehensive insights that drive key business decisions. The Windows Small Business Server Premium Add On enables you to query, search, report, and analyze important business data or run business applications from a centralized database so that all employees can easily work from the same information. Moving to an add-on model which will be available for both editions, offers more choices to customers who want the flexibility to purchase an additional server either up front or as needed.

Windows Small Business Server solutions provides the ideal platform for your small business - offering a secure, reliable and affordable solution that can easily scale to deliver the technologies that you need as you grow your business.

Windows Small Business Server 2011 Essentials

Everything a small business needs in a server, nothing it doesn't

Ideal as a first server for small businesses with up to 25 users, SBS 2011 Essentials provides a simple, easy-to-use solution to help protect your business data with daily backup features for your computers and servers, organize and access business documents from virtually anywhere with centralized storage, and provides the ability to grow and extend as the business grows.

Simplify the cloud experience. SBS 2011 Essentials also enables a cross-premise solution, allowing you to retain core infrastructure and security features on your local networks, while also including technologies such as Active Directory Federation Services to enable simple, single sign-on experiences with cloud-based services such as e-mail, collaboration and line of business applications.

Small Business Server Solution Benefit

Simplify Small Business IT

Simplified Purchase and Setup. Identify, purchase, install, and manage multiple components and technologies together in an interoperable single-server experience.

Simplified Management. Reduce administration costs by using an intuitive management interface, one that presents relevant system information and a matching set of tasks.

Increase Business Productivity

Remote Web Access. Remote Web Access provides a single, simple, consolidated, and highly secure entry point into a small business network. Access files and documents from inside and outside the business through any common web browser.

Desktop Synergies with Windows 7 and Office 2010. By combining Windows 7® and Microsoft Office® 2010 with Windows Small Business Server 2011, you will have the IT foundation you need to be more efficient and effective, to easily collaborate with your peers, to work remotely, and to feel confident that all your critical business data is protected.

Mobile Device Support. Integrated setup features configure Exchange 2010 so that you can easily add Windows Phone or other Internet-enabled phones.

Run Business Applications. Supports critical line-of-business applications and runs them on a secure award winning platform.

Tailored to Online Services. Provides a cross-premise solution, allowing small businesses to retain core infrastructure and enables simple, single sign-on experiences with cloud-based services.

Help Protect Business Data

Simplified Backup for Business Data. Businesses can easily backup server and client data to external and/or internal hard drives.

Network-wide Protection. Complete, network-wide security with integrated state of the art protection technologies.
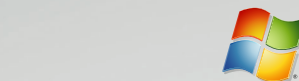

Client Protection. Monitors client computers for antivirus status, update compliance, and overall security health.

Full Client Backup. Performs a daily, automatic, backup of every computer on a network and the server itself.

Greater Business Insight

Information Organization. Streamline document access and control information sharing using a centralized data repository that can be accessed from any computer on the network.

Enhanced Support and experience for Line-of-Business With Premium Add On Applications. Run a vast number of line-of-business applications on a second server, and enjoy a powerful data management and analysis solution.
