Windows Server 2008 R2 Foundation
The Cost-effective Technology Foundation
for Your Business

Windows Server® 2008 R2 Foundation empowers your organization to run popular business applications and provides a secure, reliable IT platform for your small business. This affordable operating system can be tailored to meet your business needs. You can enable the features you need through a familiar Windows experience so it's easy to get up and running.

You should consider a server if you have multiple client machines and find it difficult to locate files that reside on hard drives of different machines. A server also helps you share resources such as printing and scanners as well as business applications.

Business Value

Achieve greater peace of mind by deploying a genuine, dependable, and cost-effective technology foundation. Windows Server 2008 R2 Foundation provides the foundation to run business applications and share information across a secure internal network.

By purchasing this genuine Windows operating system, you can be assured that you are getting the most secure version of Windows Server 2008 R2 Foundation available, which will provide greater peace of mind. Authentic Windows software does not include unauthorized or harmful software, such as spyware.

Simplicity

Windows Server 2008 R2 Foundation is compatible with most server hardware. The operating system comes pre-installed along with your server hardware so you don't need to spend time on procurement and installation.

An extensive network of trusted Microsoft partners supports Windows Server 2008 R2 Foundation. It is easy to obtain trained service and support so you can manage your IT needs.

Windows Server 2008 R2 Foundation provides an easy upgrade path to higher-end versions of Windows Server. Your IT solution can grow as your business grows.

Technology Capabilities

Windows Server 2008 R2 Foundation enables the core portfolio of IT resources, including file and print sharing, remote access, centralized computing and security features. Functioning as the heart of a true local area network, Windows Server 2008 R2 Foundation lets employees exchange data among themselves very securely, without requiring email or the Internet.
