Windows Server 2008 R2
Foundation

TOP 10 REASONS TO BUY WINDOWS SERVER 2008 R2 FOUNDATION

Windows Server® 2008 R2 Foundation, built on reliable technology, provides your organization with an affordable, easy-to-deploy foundation for running most business applications as well as sharing information and resources. This platform offers you numerous benefits:

Business Value

1. Easy on your budget
2. A server operating system running on server hardware is more reliable than running desktop PCs that are simultaneously accessed by multiple users
3. A genuine Windows Server provides greater peace of mind

Simplicity

4. Simple and familiar Windows experience
5. Easy to upgrade as your business grows
6. Compatible with most hardware devices

Technology Capabilities

7. Reliable technology to run popular business applications
8. Enables sharing of resources such as file and print
9. Remote access and security features
10. Increases employee productivity and helps secure day-to-day data exchange without requiring email or the Internet
