

Help Families Protect, Connect, Organize, and Stream Digital Media.

Affordable and easy-to-use, Windows Home Server 2011 is the ideal solution to help families keep their important digital files and data automatically backed up, organized, and accessible.

Better Protect Music, Photos, Videos, and other Important Information

Windows Home Server helps to make sure important media and data stays safe and protected by offering convenient automatic daily backups for every computer and easy-to-use disaster recovery features. With Windows Home Server, it is quick and easy to retrieve and restore important files in the event of a computer hard drive crash.

- Designed for the digital family lifestyle
- Affordable, simple and easy to use
- Automated backup of your families digital files

Easily Connect to your Digital Files

Windows Home Server provides a centralized and security-enhanced location for all your pictures, videos, music, and important documents to enable easy access and information sharing among family members. Using a personalized Web address provided by Windows Home Server, family members and friends can also access and stream music, videos and slides shows via the web.

Easily Add Computers and Customize your Server

Effortlessly increase the server capabilities as your needs grow. Easily add new computers to the network and add new users in one central location. Also expand features through third-party add-ins to enable home automation, anti-malware protection, photo sharing, and more.

Windows Home Server helps families centralize and connect their digital media and files with an easy and reliable way to store, share, stream and automatically protect what is most important.
