More screen. More curve. More impact.

Super Ultra-Wide Monitors

Simplify your day while enjoying an amazing screen experience. The Samsung CJ890 Series monitors can replace multiple monitors with a single, stunning, super ultra-wide monitor. That means no bezel right down the middle. No misalignment. No extra cables. No extra stands. Available in 43" and 49" sizes, you'll be able to work easier than ever before. View entire spreadsheets. See all your windows at once. And thanks to the curved screen, you can work longer hours with greater comfort. See more of the workday at once. The Samsung CJ890 Series monitors make it easy.

Key Features

Versatile USB-C Connectivity

USB-C allows you to transmit a digital display signal, data (USB) and power through a single cable connection. Equipped with two USB-C ports, you can connect any PC, tablet or mobile device with a USB-C port to a CJ890 Series monitor, and you'll have an instant workstation. Mobile devices will be charged, and up to three peripherals can be plugged directly into the monitor.

Large, Super Ultra-Wide Aspect Ratios

The ultimate productivity machine offers two aspect ratios: 32:10 (43") and 32:9 (49"). That's the equivalent of two 24" or 27" 16:9 monitors. You get a spacious, panoramic screen with no bezel down the middle, and without dealing with multi-monitor setups, installation and cables. Display multiple screens or use it as a single, large screen.

Ultra-Curved 1800R Panel

Samsung's super curved VA panel is designed for comfort, productivity and style. With an 1800mm radius, the distance from screen to eye is a more uniform distance, resulting in less eye fatigue when working long hours. And wide viewing angles ensure a sharp picture, even when viewed from off-angles.

Integrated KVM Switch

The built-in KVM switch lets you easily control two computers from a single keyboard, video monitor and mouse. You can switch sources back and forth, quickly and easily at the touch of a button.

Split Screen and Screen Splitting Software

PBP and PIP allow you to connect two separate sources to the CJ890 Series monitor and view them simultaneously. You can code in one window and see results in the other. And included Easy Setting Box software allows you to split a single source into multiple windows.

120hz and 144hz Refresh Rates

The fast refresh rates deliver lower cursor lag and amazingly sharp, super-smooth video. Blurring, ghosting and juddering are eliminated.
